

# DirectConnect

## ePN Direct Connect – Submit to All Capable Counties – Simply and Easily

**Submit documents to  
more counties.**

**Increase submittals  
and grow your  
business.**

**Dramatically reduce  
the costs associated  
with new submitter  
integration.**

You're a document submitter provider and you want to be able to submit to more counties. You have two choices; you can either build your own software package and customize it for every county you work with or be limited by the number of county vendors you work with. Either way it is very time consuming, tedious, and expensive.

ePN is the bridge between the document "submitter" to the county "catcher". As the submitter you are looking for ways to increase submittals that come through your system. ePN provides you the time to build those better products and services to grow your business. ePN can even help you find new counties. We will reduce your time, headache, and investment in adding new counties by dealing with the complexities of firewalls, county specific software, and the transfer of funds.

ePN is able to provide these benefits with very low up-front costs and will dramatically reduce the costs associated with new submitter integration. You won't have to spend money every time you add a new county. Spend your time growing your business by improving current products or adding new ones. By having more time you can go after new business. The net result is more eRecording!

### ***Send to more counties without the set-up customization***

With ePN Direct Connect you can add new counties to your submittal list without incurring the time, effort, and costs associated with the process of customizing to meet the requirements of each individual county and their specific recording software.

### ***Fee processing that is secure and accurate***

By using ePN your institution will automatically transfer taxes and recording fees from submitters to the county accounts by processing payments using Automated Clearing House (ACH) which is the same funds transfer method large banks use.

# DirectConnect

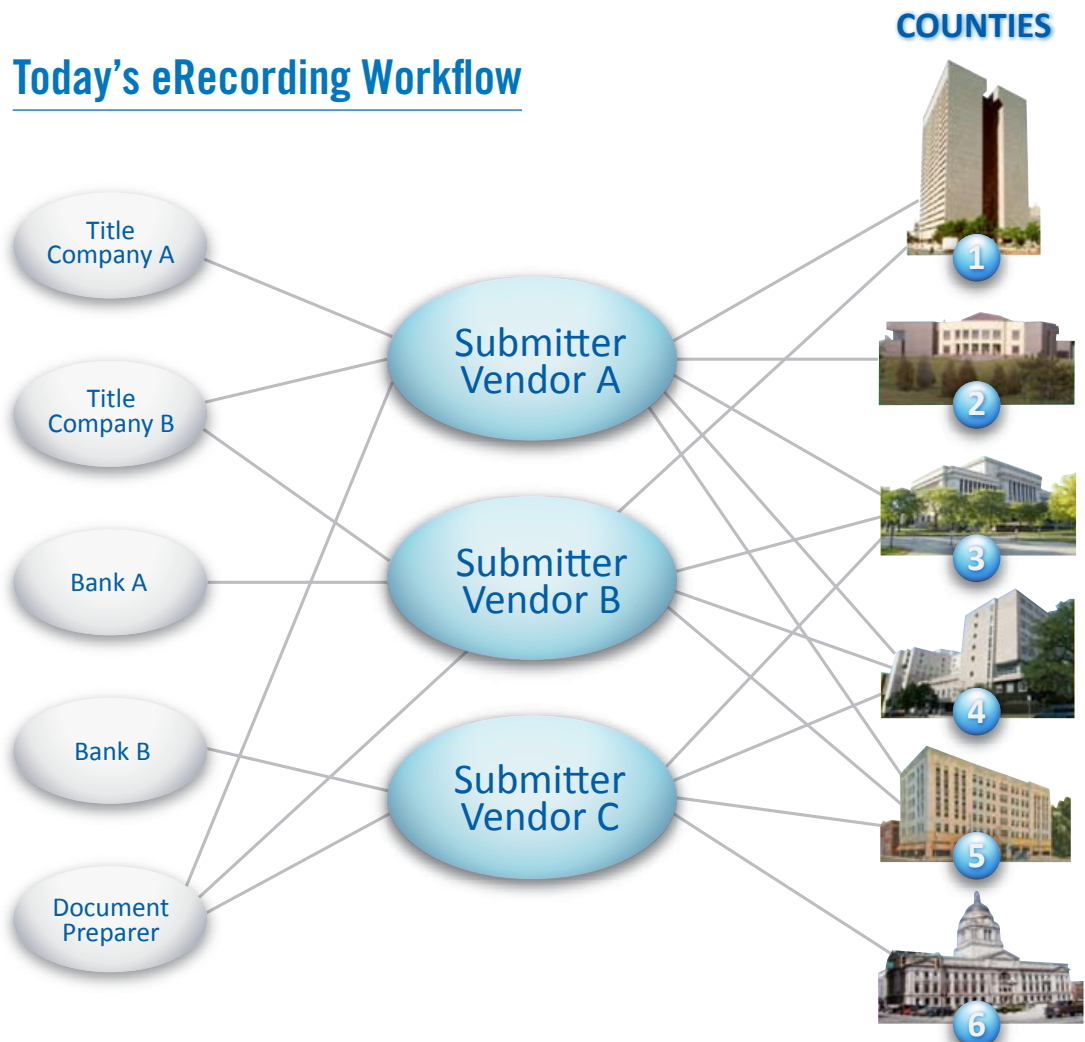

## *Increase your staff's productivity*

You will see dramatic improvements in productivity by your production and sales staffs by reducing time spent on document handling associated with traditional paper submissions. This additional time can be spent on improving current products/services and developing new ones. Combined with more time being spent on sales you will realize real growth.

## *Recording expansion*

By using ePN Direct Connect you will be able to communicate with virtually any county in the United States that is set up to eRecord. All you do is select the desired county for recording when submitting a document package. This will dramatically facilitate growth of eRecording which will increase everyone's submittals.
